

RRJETAT E KOMPJUTERAVE 1

LAB 3

Tema: A VLSM (Variable Length Subnet Mask) Addressing Design / Topology Diagram;

Addressing Table

Subnet	Number of IP Addresses Needed	Network Address
HQ LAN1	16,000	172.16.128.0/19
HQ LAN2	8,000	172.16.192.0/18
Branch1 LAN1	4,000	172.16.224.0/20
Branch1 LAN2	2,000	172.16.240.0/21
Branch2 LAN1	1,000	172.16.244.0/24
Branch2 LAN2	500	172.16.252.0/23
Link from HQ to Branch1	2	172.16.254.0/28
Link from HQ to Branch2	2	172.16.254.6/30
Link from Branch1 to Branch2	2	172.16.254.8/30

Skenari

Në këtë Skenar, adresa e rrjetit 172.16.128.0/17 është përdorur për të siguruar adresimin IP për rrjetin e paraqitur në Diagramin e Topologjisë. VLSM është përdorur për të bërë subnetting gabimisht hapësirën e adresave.

Do t'ju duhet të zgjidhni problemin e adresimit që është caktuar për çdo nënrrjet për të përcaktuar se ku janë të pranishme gabimet dhe më pas të përcaktoni caktimet e sakta të adresimit, aty ku është e nevojshme.

Task 1: Examine the Addressing for the HQ LANs.

Step 1: Examine the addressing assignment for the HQ LAN1 subnet and answer the questions below:

1. How many IP addresses are needed for the HQ LAN1 subnet? _____
2. How many IP addresses are available in the currently assigned subnet?

3. Will the currently assigned subnet fulfill the size requirement for the HQ LAN1 subnet? _____
4. If the answer to the previous question is **no**, propose a new subnet mask that will allow for the correct number of IP addresses. _____
5. Does the subnet overlap with any of the other currently assigned networks?

6. If the answer to the previous question is **yes**, propose a new subnet mask that will allow for the correct number of IP addresses without overlapping into any other subnets.

Step 2: Examine the addressing assignment for the HQ LAN2 subnet and answer the questions below.

1. How many IP addresses are needed for the HQ LAN2 subnet? _____
2. How many IP addresses are available in the currently assigned subnet?

3. Will the currently assigned subnet fulfill the size requirement for the HQ LAN2 subnet? _____
4. If the answer to the previous question is **no**, propose a new subnet mask that will allow for the correct number of IP addresses. _____
5. Does the subnet overlap with any of the other currently assigned networks? _____
6. If the answer to the previous question is **yes**, propose a new subnet mask that will allow for the correct number of IP addresses without overlapping into any other subnets.

Task 2: Examine the Addressing for the Branch1 LANs.

Step 1: Examine the addressing assignment for the Branch1 LAN1 subnet and answer the questions below.

1. How many IP addresses are needed for the Branch1 LAN1 subnet?

2. How many IP addresses are available in the currently assigned subnet?

3. Will the currently assigned subnet fulfill the size requirement for the Branch1 LAN1 subnet? _____

4. If the answer to the previous question is **no**, propose a new subnet mask that will allow for the correct number of IP addresses. _____

5. Does the subnet overlap with any of the other currently assigned networks? _____

6. If the answer to the previous question is **yes**, propose a new subnet mask that will allow for the correct number of IP addresses without overlapping into any other subnets. _____

Step 2: Examine the addressing assignment for the Branch1 LAN2 and answer the questions below.

1. How many IP addresses are needed for the Branch1 LAN2 subnet? _____

2. How many IP addresses are available in the currently assigned subnet? _____

3. Will the currently assigned subnet fulfill the size requirement for the Branch1 LAN2 subnet? _____

4. If the answer to the previous question is **no**, propose a new subnet mask that will allow for the correct number of IP addresses. _____

5. Does the subnet overlap with any of the other currently assigned networks? _____

6. If the answer to the previous question is **yes**, propose a new network address that will allow for the correct number of IP addresses without overlapping into any other subnets. _____

Task 3: Examine the Addressing for the Branch2 LANs.

Step 1: Examine the addressing assignment for the Branch2 LAN1 subnet and answer the questions below.

1. How many IP addresses are needed for the Branch2 LAN1 subnet? _____

2. How many IP addresses are available in the currently assigned subnet? _____

3. Will the currently assigned subnet fulfill the size requirement for the Branch2 LAN1 subnet? _____

4. If the answer to the previous question is **no**, propose a new subnet mask that will allow for the correct number of IP

addresses. _____

5. Does the subnet overlap with any of the other currently assigned networks? _____

6. If the answer to the previous question is **yes**, propose a new subnet mask that will allow for the correct number of IP

addresses without overlapping into any other subnets.

Step 2: Examine the addressing assignment for the Branch2 LAN2 and answer the questions below.

1. How many IP addresses are needed for the Branch2 LAN2 subnet?

2. How many IP addresses are available in the currently assigned subnet?

3. Will the currently assigned subnet fulfill the size requirement for the Branch2 LAN2 subnet? _____

4. If the answer to the previous question is **no**, propose a new subnet mask that will allow for the correct number of IP

addresses. _____

5. Does the subnet overlap with any of the other currently assigned networks? _____

6. If the answer to the previous question is **yes**, propose a new network address that will allow for the correct number of

IP addresses without overlapping into any other subnets.

Task 4: Examine the Addressing for the Links between Routers.

Step 1: Examine the addressing assignment for the link between the HQ and Branch1 routers and answer the questions below.

1. How many IP addresses are needed for the link between the HQ and Branch1 routers? _____

2. How many IP addresses are available in the currently assigned subnet?

3. Will the currently assigned subnet fulfill the size requirement for the link between the HQ and Branch1 routers?

4. If the answer to the previous question is **no**, propose a new subnet mask that will allow for the correct number of IP

addresses. _____

5. Does the subnet overlap with any of the other currently assigned networks? _____

6. If the answer to the previous question is **yes**, propose a new subnet mask that will allow for the correct number of IP addresses without overlapping into any other subnets.

Step 2: Examine the addressing assignment for the link between the HQ and Branch2 routers and answer the questions below.

1. How many IP addresses are needed for the link between the HQ and Branch2 routers? _____

2. How many IP addresses are available in the currently assigned subnet? _____

3. Will the currently assigned subnet fulfill the size requirement for the link between the HQ and Branch2 routers? _____

4. If the answer to the previous question is **no**, propose a new subnet mask that will allow for the correct number of IP addresses. _____

5. Does the subnet overlap with any of the other currently assigned networks? _____

6. If the answer to the previous question is **yes**, propose a new network address that will allow for the correct number of IP addresses without overlapping into any other subnets.

Step 3: Examine the addressing assignment for the link between the Branch1 and Branch2 routers and answer the questions below.

1. How many IP addresses are needed for the link between the Branch1 and Branch2 routers? _____

2. How many IP addresses are available in the currently assigned subnet? _____

3. Will the currently assigned subnet fulfill the size requirement for the link between the Branch1 and Branch2 routers? _____

4. If the answer to the previous question is **no**, propose a new subnet mask that will allow for the correct number of IP addresses. _____

5. Does the subnet overlap with any of the other currently assigned networks? _____

6. If the answer to the previous question is **yes**, propose a new subnet mask that will allow for the correct number of IP addresses without overlapping into any other subnets.

Task 5: Document the Corrected Addressing Information.

Record the corrected addressing information in the Addressing Table below.

Subnet	Number of IP Addresses Needed	Network Address
HQ LAN1	16,000	
HQ LAN2	8,000	
Branch1 LAN1	4,000	
Branch1 LAN2	2,000	
Branch2 LAN1	1,000	
Branch2 LAN2	500	
Link from HQ to Branch1	2	
Link from HQ to Branch2	2	
Link from Branch1 to Branch2	2
